

## **WEBSITE DEVELOPMENT PROPOSAL FOR CUCASO**

Coastal Universities and Colleges Adventists Students Organization

Proposed Website: CUCASO Official Digital Platform

Prepared for:

Coastal Universities and Colleges Adventists Students Organization (CUCASO)

Proposed platform: Modern, responsive and mobile-friendly website

Purpose: To establish a professional digital home for CUCASO that connects Adventist students, institutions,

leaders, alumni and partners across the Coastal region.

## **1. Executive Summary**

The Coastal Universities and Colleges Adventists Students Organization (CUCASO) brings together Adventist students and organized Adventist groups within universities and colleges across the Coastal region.

As CUCASO continues to coordinate spiritual programs, inter-institutional rallies, retreats, conventions, evangelism, fellowship and other activities, there is a growing need for a centralized digital platform where members and the wider community can easily access reliable information about the organization.

This proposal therefore recommends the development of an official CUCASO website that will serve as the organization's digital headquarters.

The website will provide a beautiful and accessible platform through which CUCASO can:

Introduce its identity, mission and vision.

Connect Adventist student groups across institutions.

Publish upcoming events and programs.

Share announcements and important communications.

Showcase CUCASO activities and achievements.

Provide information about leadership and member institutions.

Support registration for events and programs.

Provide access to constitution and organizational documents.

Share photographs, videos, testimonies and stories.

Strengthen communication between students, institutions, alumni and church leadership.

Create a lasting digital presence for CUCASO.

The proposed platform will not simply be an informational website. It will become a digital fellowship, communication and information hub for Adventist students across the Coastal region.

## **2. Background**

The CUCASO Constitution establishes the organization as the Coastal Universities and Colleges Adventists Students Organization. Its establishment is rooted in the desire to bring Adventist students together, encourage one another, share their faith and support the mission of the Seventh-day Adventist Church.

The Constitution identifies objectives including spiritual, mental, physical and social development, coordination of inter-institutional rallies, retreats and conventions, evangelism, fellowship, mutual understanding and cooperation among institutions.

With CUCASO serving multiple institutions and communities, traditional communication methods alone may make it difficult to maintain a centralized source of information.

A website will therefore provide a permanent digital platform through which information can be organized, published and accessed by members regardless of their institution or geographical location.

### **3. Vision for the Website**

“Connecting Students. Strengthening Fellowship. Advancing the Mission.”

The proposed website will present CUCASO as a united, vibrant and digitally connected community of Adventist students.

It will combine:

Faith + Fellowship + Communication + Service + Innovation + Community

The website should communicate the message that although members come from different institutions, they are part of one larger CUCASO family.

#### **4. Proposed Website Objectives**

The website will aim to:

##### **4.1 Strengthen Communication**

Create one official platform where members can find verified CUCASO announcements, programs, notices and updates.

##### **4.2 Connect Institutions**

Create a digital network linking Adventist student organizations from participating universities and colleges across the Coastal region.

##### **4.3 Promote Spiritual Growth**

Provide access to spiritual programs, devotionals, Bible study resources, Sabbath programs, evangelism activities and other approved resources.

##### **4.4 Promote CUCASO Activities**

Provide a professional platform for advertising:

Rallies

Retreats

Conventions

Vespers

Sabbath programs

Evangelism programs

Leadership programs

##### **4.5 Preserve Organizational Information**

Make important organizational documents, including the Constitution, accessible to members where appropriate.

##### **4.6 Showcase Impact**

Document CUCASO activities through photographs, videos, testimonies, reports and stories.

##### **4.7 Improve Event Registration**

Allow members to register online for selected CUCASO programs and activities.

A professionally designed website can provide the digital infrastructure needed to support these objectives in a modern environment.

The proposed website will become more than a website.

It will be a digital home for CUCASO — a place where students connect, institutions collaborate, leaders communicate, stories are shared, faith is nurtured and the mission continues beyond the walls of individual campuses.
